

KEYNSHAM REGENERATION, BRISTOL

WILLMOTT DIXON

PROJECT DETAIL:

2 x 4 floor 1000KG, 13 person MRL Traction Passenger Lift with Evacuation Control to BS9999:2008

1 x 2 Floor, 1275kg, 17 person, Traction MRL, Type 2 Passenger Lift

The construction method used for these buildings was a new technique using Cross Laminated Timber. HOISTWAY therefore had to design these lifts to be installed with timber construction lift shafts. This we did by creating and testing a special resin anchor system to hold the guide brackets to the timber panels.
